LISTENING SIKILLS

Week we had a lesson about HIV and AIDS. AIDS is a dangerous diseases caused by a virus called HIV. It neither has cure nor vaccinate. It can attack people of all kinds. We can tell whether a person has HIV and AIDS or not by doing blood test at hospital.

Some of the main ways of transmitting HIV are sexual intercourse, sharing sharp objects with infected person, and unsafe blood transfusion. When the level of HIV is high in the blood a person suffers from AIDS.
