COMPREHENSION

6. Read the following passage carefully and then answer the questions that follow in item (i)-(v) It was on Thursday evening when our village got a wonderful accident ever. The children had a football match between Simba queens and Dar Younga princess supporters. The football pitch was nearby the

village well. The match began as a friendly competition with fair treatment to all players. Miriam the Yanga player got fantastic cross from Kipanya that she shot it directly to the goal the Simba goal-keeper failed to catch that fast ball and led Yanga princess players to cheer up happily with the first goal. While still cheering, Chiku a Simba queen player lost her match happiness and became very sad with full of anger. While still hungry Chiku pushed Miriam into the well. The referee called Chiku for the first time warning. Before she was warned, the Yanga princess players pushed both the referee and Chiku into the well. All of them didn't know how to swim, this resulted to the death of three people at once. When the villagers came, the last player had already run away. The village chair-person warned the villagers the effects of placing the entertainment areas close to the dangerous sites. Since that day, it was strictly prohibited to construct wells nearby the pitch. Because of this disaster the match was then nullified.

Questions

- i. On which day did the accident take place? _____
- ii. Who scored the only goal in the match? _____
- iii. According to the passage, what do people get from the well? _____
- iv. Mention one person who died inside the well _____

[]

LISTENING SKILLS STANDARD SIX

Water pollution is a problem for species and ecosystem. It affects plants and organisms living there. In almost all cases the effect is dangerous not only to individual species and population, but also to the wider biological communities. The colour is usually green or brown but normal water can be Agriculture is one of the major causes of water pollution. The fertilizers given to crops for better growth are washed into rivers and lakes which in turn pollute the water. Wastes from homes, factories and other buildings get into water bodies as a result water gets contaminated. Earth is the only planet to have liquid water on its surface. Water is an important element of human health, polluted water directly affects human body. The human body must require to nearest 3 litres of water everyday. Water is one of the very important elements of life and the environment.
