MATHEMATICS
SECTION A (10 Marks)

NOVEMBER 2024

For each of the following questions, work out the answer in the space provided showing all work clearly

No.	Question	Working space and answers
1.	(a) $451 + 69 =$	
	(b) $10231 - 4232 =$	
	(c) $54 \times 17 =$	
	(d) $240 \div 48 =$	
	(e) $\frac{2}{7} + \frac{2}{5} =$	
	(f) $3.4 + 1.5 =$	

$$(g) \frac{3}{4} \times \frac{3}{5} =$$

$$(h) 24.5 - 13.7 =$$

$$(i) 2 - \frac{1}{3} =$$

$$(j) 3.42 \times 8 =$$

SECTION B (30 Marks)

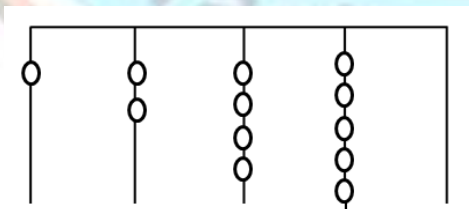

Answer **all** questions in this section

2. (a) Write "five hundred thousand one hundred and fifty in numerals

(b) Which digit is in ten thousands place value in the number 618034

(c) An athlete wore a jersey written 215. Write that number in Roman numerals

(d) Write the total value of 4 in the number represented by the abacus below

(e) Write the smallest number formed by using 5 digits without repeating a digit

	(f) Which fraction among the following is improper fraction? ($\frac{1}{2}$, $\frac{2}{6}$, $\frac{9}{5}$, $1\frac{2}{3}$)	
3	(a) How many odd numbers are there between 30 and 40?	
	(b) Find the Greatest Common Factor (GCF) of 13 and 39	
	(c) Write the missing numbers in the following sequence 18,16,14,12,_____, _____	
4.	(a) When a certain number is multiplied by itself the answer is 625. What is that number?	
	(b) A kangaroo ran $\frac{1}{3}$ of a distance of 15 kilometres. What distance did the kangaroo run?	
	(c) Find the difference between 5 hours 30 minutes and 7 hours 15 minutes	
5.	(a) Multiply Years 22 x _____ Months 11 3	
	(b) How many centimetres are there in 3 metres	

	m	cm
	6	81
+	3	45

(a) What is the coefficient in the expression below
 $2x^2$

(b) Simplify the following algebraic expression
 $5a - 3b + 2a$

(c) Which number when added to 5000 the answer is 50000?

SECTION C (10 Marks)

Answer **all** questions in this section

The following table shows the number of malaria patients at Magori Health Centre in four months. Study it carefully then answer the questions that follow

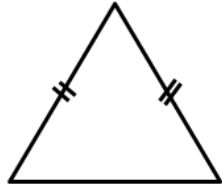

Months	January	February	March	April
Number of patients	160	180	120	200

(a) What is the difference in the number of patients recorded in January and April?

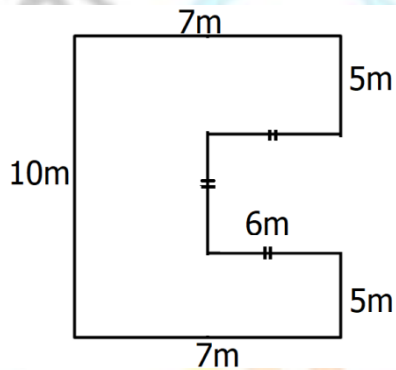

(b) Find the average number of patients recorded at that health centre from January to April

(a) A triangle has a height of 25m and a base of 32m. Calculate its area

(b) How many symmetrical lines are there in the shape below?

(c) The figure below represents the administration building of Maarifa primary school. What is the total distance around the building?

Passage

Upendo was a beautiful girl who lived with her parents and grandmother in Mulamke village. She always fetched firewood, looked after the sheep and brought home wild fruits for her grandmother. Upendo loved her grandmother a lot.

One evening, as Upendo was returning home, she saw many women gathered at her home. They looked strange and they were dressed in traditional dresses. Their faces were painted with a brown soft soil. They were also carrying long traditional sticks, knives and pots. The grandmother ran towards Upendo. She smiled and hugged her. She said, "today you are going to become a woman." Upendo did not understand what she meant.

She was wrapped in a beautiful traditional dress by her mother and later she was taken through the entrance by the women who were dancing and singing traditional songs. Upendo became aware of what was going to happen to her so she screamed. Some people who are Good Samaritan informed the police officers about it. The police officers came to the scene and stopped the people. One of the officers spoke to the gathering. 'Female circumcision is not good; it is dangerous. It causes much pain, loss of blood and may sometimes lead to death. It must therefore be stopped.'
