MATHEMATICS

STANDARD FOUR

Pre-mock exam - July 2025
Answer Key and Worked Solutions

Subject	Mathematics
Code	Not printed in source
Level	Standard Four
Year	2025
Exam Board / Issuer	Bariadi Town Council (UMEKTA)
Exam	Pre-mock exam - July
Type	Answer key and worked solutions
Questions	25 numbered questions/subparts

Try each question before checking the solution. Follow the steps, compare your working, and practise the parts you find difficult.

Notes about the source paper

Items with missing information or printing errors are explained in their solutions. A model response is an example, rather than a prescribed official answer.

Numbers and applications

1(i). Write eighty-two thousand four hundred and sixty-nine goats in numerals.

Step 1: $82000 + 400 + 60 + 9 = 82469$.

Final Answer: 82469 goats

1(ii). Give the tens digit of 580247.

Step 1: The second digit from the right is 4.

Final Answer: 4

1(iii). Which digit in 61374 has value 50 + 20?

Step 1: $50 + 20 = 70$.

Step 2: 7 is in the tens place, with value 70.

Final Answer: 7

1(iv). Write CDXL in Hindu-Arabic numerals.

Step 1: $CD = 500 - 100 = 400$; $XL = 50 - 10 = 40$.

Step 2: $400 + 40 = 440$.

Final Answer: 440

1(v). Convert 4 hours 20 minutes to minutes.

Step 1: $4 \times 60 = 240$.

Step 2: $240 + 20 = 260$.

Final Answer: 260 minutes

1(vi). Arrange 400,420,4440,460,480 in descending order.

Step 1: 4440 has the most digits; order the rest by tens.

Final Answer: 4440,480,460,420,400

2(i). How many halves are in two wholes?

Step 1: $2 \div (1/2) = 4$.

Final Answer: 4 halves

2(ii). Eliud gives $1/4$ of 20 sacks to his brother. How many sacks?

Step 1: $20 \div 4 = 5$.

Final Answer: 5 sacks

2(iii). A pupil drinks $3/4$ litre daily. How many litres in 6 days?

Step 1: $6 \times 3 = 18$.

Step 2: $18/4 = 9/2 = 4.5$.

Final Answer: 4 $1/2$ litres

2(iv). Mzize buys $5/7$ of a farm and cultivates $2/7$ of the whole farm. What part of the whole remains uncultivated from his purchase?

Step 1: Subtract fractions with denominator 7.

Step 2: $5 - 2 = 3$; keep denominator 7.

Final Answer: $3/7$ of the whole farm

2(v). Calculate $21 \times 1/7$.

Step 1: $21/7 = 3$.

Final Answer: 3

3(ii). Write 19.40 shillings in words.

Step 1: 19 is the shillings; 0.40 is 40 cents.

Final Answer: Nineteen shillings and forty cents

3(iii). Add Sh 3400 st 50 and Sh 1200 st 30.

Step 1: Cents: $50 + 30 = 80$.

Step 2: Shillings: $3400 + 1200 = 4600$.

Final Answer: Sh 4600 st 80

4(i). How many days make 168 hours?

Step 1: 24 hours make 1 day.

Step 2: $168 / 24 = 7$.

Final Answer: 7 days

4(ii). Convert 9:47 in the morning to 24-hour time.

Step 1: Morning hours retain the same number; add the leading 0.

Final Answer: 09:47

4(iii). A train leaves 05:30 and arrives 08:45 the same morning. Find the journey time.

Step 1: 05:30 to 08:30 is 3 hours.

Step 2: 08:30 to 08:45 is 15 minutes.

Final Answer: 3 hours 15 minutes

4(iv). Draw a clock showing quarter past six.

Step 1: Quarter hour is 15 minutes; long hand points 3.

Step 2: Short hand lies a quarter of the way from 6 to 7.

Final Answer: 6:15; minute hand 3, hour hand just past 6.

5(i). Children drank 1 litre yesterday and 2 litres later. How many millilitres altogether?

Step 1: $1 + 2 = 3$ litres.

Step 2: $3 \times 1000 = 3000$.

Final Answer: 3000 ml

5(ii). Which is heavier: 2 litres of water or 3000 ml of cooking oil?

Step 1: Convert 3000 ml to 3 litres.

Step 2: Volume alone does not determine mass for different liquids; densities are not supplied.

Step 3: Oil is heavier if its density exceeds $\frac{2}{3}$ of the density of water; otherwise water is heavier (equal at $\frac{2}{3}$).

Final Answer: Insufficient information for mass comparison; 3 litres of oil is the greater volume.

5(iii). Convert 4 metres to centimetres.

Step 1: $1 \text{ m} = 100 \text{ cm}$.

Step 2: $4 \times 100 = 400$.

Final Answer: 400 cm

6(i). Find perimeter of the triangle with printed sides 9 cm, 7 cm, 15 cm.

Step 1: Perimeter is the sum of its three labelled sides.

Step 2: $9 + 7 + 15 = 31$.

Step 3: The right-looking drawing is inconsistent: 7 cm cannot be the hypotenuse when legs are 9 cm and 15 cm.

Final Answer: 31 cm using printed side lengths

6(ii). Find area of the rectangle 40 cm long and 15 cm wide.

Step 1: Area = length $\times$ width.

Step 2: $40 \times 15 = 600$.

Final Answer: 600 cm²

6(iii). A square garden has perimeter 40 m. Find one side.

Step 1: Four sides are equal.

Step 2: $40 \div 4 = 10$.

Final Answer: 10 m

6(iv). Find area of a triangular garden with base 6 m and height 9 m.

Step 1: Area = base x height / 2.

Step 2: $6 \times 9 = 54$.

Step 3: $54 / 2 = 27$.

Final Answer: 27 m²

Section Summary: Read each value and unit carefully. Align place values and check calculations by reversing the operation. For pictures, count only the requested objects.

Calculations

3(i). Mwajuma has 21000 shillings and spends 7500. What remains?

Step 1: 1 place: $0 - 0 = 0$.

Step 2: 10 place: $0 - 0 = 0$.

Step 3: 100 place: regroup 1 from the next place; $10 - 5 = 5$.

Step 4: 1000 place: regroup 1 from the next place; $10 - 7 = 3$.

Step 5: 10000 place: $1 - 0 = 1$.

Step 6: $21000 - 7500 = 13500$; check $13500 + 7500 = 21000$.

Final Answer: 13500 shillings

Section Summary: Read each value and unit carefully. Align place values and check calculations by reversing the operation. For pictures, count only the requested objects.
