STANDARD FOUR

National Assessment 2020
Answer Key and Worked Solutions

Subject	Mathematics
Code	04E
Level	Standard Four
Year	2020
Exam Board	NECTA
Exam	National Assessment
Type	Answer key and worked solutions
Questions	5 questions, each with 5 parts

Try each question before checking the solution. Follow the steps, compare your working, and practise the parts you find difficult.

Source paper: Mathematics-S4-2020.pdf

Question 1: Numbers and Place Value

1(a). Write 12,659 in words.

Step 1: Separate 12,000 and 659.

Step 2: Read 12,000 as twelve thousand; read 659 as six hundred and fifty-nine.

Final Answer: Twelve thousand six hundred and fifty-nine.

1(b). Write eleven thousand one hundred and eleven in numerals.

Step 1: Eleven thousand = 11,000; one hundred = 100; eleven = 11.

Step 2: Add $11,000 + 100 + 11$.

Final Answer: 11,111.

1(c). Write three over four as a fraction.

Step 1: The numerator is 3.

Step 2: The denominator is 4.

Final Answer: $\frac{3}{4}$.

1(d). Write the fraction of the shaded shapes.

Step 1: Count all three equal-sized shapes.

Step 2: Two of the three shapes are shaded.

Final Answer: $\frac{2}{3}$.

1(e). Write Musa's age, 40 years, in Roman numerals.

Step 1: X = 10 and L = 50.

Step 2: X before L means subtract 10 from 50.

Final Answer: XL.

Section Summary: Read each digit's place and distinguish ordinary numbers from Roman numerals.

Question 2: Sequences and Comparison

2(a). Arrange 125, 78, 111, 89, 305, 32, 120 from largest to smallest.

Step 1: First compare hundreds: 305 is largest, followed by the numbers in the hundreds.

Step 2: Order those as 125, 120, 111, then compare the two-digit numbers.

Final Answer: 305, 125, 120, 111, 89, 78, 32.

2(b). Find the missing number: 36, 33, 30, __, 24.

Step 1: The numbers decrease by 3.

Step 2: $30 - 3 = 27$; $27 - 3 = 24$ checks the pattern.

Final Answer: 27.

2(c). Find the next two Roman numerals after X, XV, XX, XXV.

Step 1: Their values are 10, 15, 20, 25, increasing by 5.

Step 2: The next values are 30 and 35.

Final Answer: XXX, XXXV.

2(d). Tree heights are 5 m, 8 m, 11 m, 14 m. Find the fifth height.

Step 1: Each height increases by 3 m.

Step 2: Add 3 m to 14 m.

Final Answer: 17 m.

2(e). Start at 80 and decrease by 10 each time. Find the sixth number.

Step 1: There are five changes between the first and sixth numbers.

Step 2: 80, 70, 60, 50, 40, 30.

Final Answer: 30.

Section Summary: Find the repeated change first; count the gaps between terms.

Question 3: Operations and Time

3(a). Multiply 282 by 17.

Step 1: $282 \times 7 = 1,974$.

Step 2: $282 \times 10 = 2,820$.

Step 3: Add $1,974 + 2,820$.

Final Answer: 4,794.

3(b). Juma receives ten coins worth sh. 500 each. How much does he receive?

Step 1: Multiply the number of coins by the value of one coin.

Step 2: $10 \times 500 = 5,000$.

Final Answer: Sh. 5,000.

3(c). Subtract sh. 120 from sh. 2,750.

Step 1: $2,750 - 100 = 2,650$.

Step 2: $2,650 - 20 = 2,630$.

Final Answer: Sh. 2,630.

3(d). Find the cost of six oranges at sh. 200 each, one exercise book at sh. 2,000, and three pens at sh. 700 each.

Step 1: Oranges: $6 \times 200 = 1,200$; pens: $3 \times 700 = 2,100$.

Step 2: Add $1,200 + 2,000 + 2,100$.

Final Answer: Sh. 5,300.

3(e). Add 5 hours 38 minutes and 3 hours 45 minutes.

Step 1: Minutes: $38 + 45 = 83 = 1 \text{ hour } 23 \text{ minutes}$.

Step 2: Hours: $5 + 3 + 1 = 9$.

Final Answer: 9 hours 23 minutes.

Section Summary: Keep the units consistent. Regroup every 60 minutes as one hour.

Question 4: Shapes and Measurement

4(a). Name the shape whose sides are all the same length.

Step 1: Recall the common four-sided shapes studied at this level.

Step 2: A square has four equal sides and four right angles.

Final Answer: A square (the intended elementary shape).

Study Tip: Other shapes can also have equal sides. A square is identified by equal sides together with right angles.

4(b). How many litres are ten half-litres?

Step 1: Half a litre = $\frac{1}{2}$ litre.

Step 2: $10 \times \frac{1}{2} = 5$.

Final Answer: 5 litres.

4(c). Convert 16,000 g to kg.

Step 1: $1 \text{ kg} = 1,000 \text{ g}$.

Step 2: $16,000 / 1,000 = 16$.

Final Answer: 16 kg.

4(d). Convert 25 m to centimetres.

Step 1: $1 \text{ m} = 100 \text{ cm}$.

Step 2: $25 \times 100 = 2,500$.

Final Answer: 2,500 cm.

4(e). Convert 2 km to metres.

Step 1: $1 \text{ km} = 1,000 \text{ m}$.

Step 2: $2 \times 1,000 = 2,000$.

Final Answer: 2,000 m.

Section Summary: Use the shape's sides, perimeter formula and metric units carefully.

Question 5: Reading Data

5(a). On which day did Anold score highest in the bar chart?

Step 1: Read Monday = 35, Tuesday = 30, Wednesday = 40.

Step 2: Compare the heights; the 40-mark bar is highest.

Final Answer: Wednesday.

5(b). Which month had most pupils pass: February 68, March 74, April 52, May 69?

Step 1: Compare 68, 74, 52 and 69.

Step 2: The greatest count is 74.

Final Answer: March.

5(c). Find the lowest pen sales: sh. 22,000, 21,000, 23,000 and 20,000.

Step 1: Compare all four amounts.

Step 2: The smallest amount is 20,000.

Final Answer: Sh. 20,000.

5(d). Find the total books provided in four years: 132, 145, 142 and 124.

Step 1: $132 + 145 = 277$.

Step 2: $142 + 124 = 266$.

Step 3: $277 + 266 = 543$.

Final Answer: 543 books.

5(e). Find the total rice harvest shown as 3, 4, 5 and 6 tonnes.

Step 1: Read the height of each of the four bars.

Step 2: $3 + 4 + 5 + 6 = 18$.

Final Answer: 18 tonnes.

Section Summary: Read the key, count every symbol, and distinguish the year from the numerical value.
